Westview Hacks

Who are we?

We're a group of local high school students who loves tech and programming!

What is Westview Hacks?

Westview Hacks is an event where students aged 13-18 all over San Diego come together to code. Over the span of 12 hours, attendees will code an **app, website, or a game** either by themselves or in small teams. Over the course of this **hackathon**, students will have the opportunity to attend skills workshops taught by experienced programmers and learn something new! This event will be completely **free and accessible to all**, encouraging that students of all backgrounds to come. Our goal is to **provide avenues to expose students to programming - starting with Westview Hacks**.

How you can help

Your sponsorship is critical to the success of Westview Hacks. We're looking for money to fund for **food, venue, prizes, cool swag**, and more! We accept donations of all types, whether it's money, stickers, or tools. Your sponsorship will ensure the opportunity for local students a chance to collaborate with other young innovators, opening doors to a brighter future for our society.

If you are interested in supporting our cause, send us an email (**team@westviewhacks.org**) and let's set up a phone call or meeting
